

Second-Party Audits

Ensure and strengthen the image of your company and its products and services on the market.

DQS second-party audits

DQS second-party audits enable you to accurately assess the performance of your suppliers against specific requirements defined by you and/or management system standards applicable to your industry.

Trust our long history of experience in management systems to support you with the development of your organizational requirements.

“We will help your business succeed”

With the help of custom-tailored second party assessment solutions, we put an independent set of eyes and ears on your operations worldwide.

We ensure that your suppliers are maintaining and improving the standards you have specified. Our auditors will verify your suppliers compliance with all applicable requirements.

Second-party audits will point out strengths and weaknesses, show non-conformities and highlight improvement potential.

Additionally they will help you to start communicating with your suppliers and take a joint step towards quality improvement of co-produced goods and services.

Knowing your suppliers will ultimately strengthen your trust with regard to the products supply chain; a trust you can confidently display and pass on to your paying customers.

The benefits

- Reduced costs and improved margins
- Quality improvement within your own organization and supply chain
- Performance benchmarking
- Protect your brand and enhance it
- Enhance performance and value from agents, contractors and suppliers
- Improve your company's image and client confidence

Why DQS?

The first German certification body for management systems, DQS Group has been at the forefront of new developments in standardization and process improvement methods for more than 30 years now.

With international offices in over 80 countries, more than 2,500 auditors, and in excess of 200 services offered, we offer individual, customtailored assessment solutions that generate real added-value – for your maximum benefit.
